MASSACHUSETTS BOARD OF EDUCATION

Mr. James F. Crain, *Chairperson*, Gloucester
Mr. Joseph E. Killory, *Vice Chairperson*, Sandwich

Dr. Raquel Bauman, Holden
Mr. John J. Gould, Waltham
Mr. James R. Grande, Hanover
Ms. Susan J. Hubbard, Winthrop
Mr. Sol Kolack, Newton
Mrs. Anne S. Larkin, Bedford
Ms. Theodora A. Sylvester, Springfield
Mrs. Frances M. Turner, South Egremont
Dr. Joan Wallace-Benjamin, Boston
Mrs. Mary C. Wright, Falmouth

Dr. Franklyn Jenifer, *ex officio Board Member, Chancellor, Board of Regents of Higher Education*

Harold Raynolds, Jr., *Commissioner of Education, Secretary of the Board of Education*

OFFICE OF PLANNING, RESEARCH AND EVALUATION

Allan S. Hartman, Director of Research

M. Elizabeth Badger
Sheila Lima
Beverly Miyares
Brenda Thomas
Mary Robertson

The Massachusetts Department of Education insures equal employment/educational opportunities/affirmative action regardless of race, color, creed, national origin or sex, in compliance with Title IV and Title IX, or handicap, in compliance with section 504.

THE MASSACHUSETTS TESTING PROGRAM

Background

"An Act Improving the Public Schools of the Commonwealth" was signed into law by Governor Michael S. Dukakis in July 1985. This legislation, Chapter 188 of the Acts of 1985, established a statewide testing program which began in 1986.

The Massachusetts Testing Program has three purposes:

- to improve curriculum and instruction in the public schools and districts;
- to identify students needing assistance in mastering basic skills in the classroom;
- to make results available to the public.

To accomplish the first purpose, the Board of Education created the Massachusetts Educational Assessment Program, which tests students at three grade levels biennially. Results are reported at the school, district and state levels; in addition, the performance of Massachusetts students may be compared to that of their peers nationally.

The Massachusetts Basic Skills Testing Program was initiated in response to the second mandate. Each year, students in grades 3, 6 and 9 are tested in reading, writing and mathematics. Results are reported at the individual, school, district and state levels.

The table below compares different features of the two programs.

	BASIC SKILLS	ASSESSMENT
Purpose	Identify and assist students who are deficient in basic skills	Improve curriculum and instruction
Content Areas	Reading, writing, mathematics	1986: Reading, mathematics, science *1988: Reading, mathematics, science, social studies
Grade levels	3, 6, 9	1986: 3, 7, 11 *1988: 4, 8, 12
Exemptions	Students incapable of performing ordinary classwork in English and who have been enrolled in transitional bilingual education programs for fewer than three full years (unless testing is requested by parent); Special education students (if exemption is requested by parent)	
Testing Frequency	Annually, in fall	Biennially, in spring
Testing Time	60 minutes per subject	90-120 minutes total (including questionnaire)
Information Collected	Student test performance; background information for Comparison Score Bands	Student test performance, background and attitude information; school and teacher background and attitude information
Standards	65% correct in reading and mathematics; minimum writing proficiency	None
Retesting	Required for students who have not passed any grade 9 test(s)	None
Test Booklets	Uniform tests for each subject	Many booklets, each containing a selection of items from all subjects tested
Reporting Levels	Student, school, district and state	School, district and state, with comparisons to national performance
Results Reported	January—March	November

*The addition of social studies and the change in grade levels between 1986 and 1988 were made to conform to the plans of the National Assessment for Educational Progress, which supplies data for the national comparisons stipulated in Chapter 188.

Objectives and test questions for both programs were developed with the advice and guidance of curriculum committees composed of Massachusetts educators and administrators. For the Assessment, the committees reviewed hundreds of test items for each grade level and selected those they deemed most appropriate for use in the Massachusetts program. The items came from previous MEAP tests, from NAEP tests, and from questions developed and field tested specifically for Massachusetts students. All questions used in the Massachusetts Basic Skills Tests were developed for the program and field tested by students in Massachusetts. All tests were reviewed by an equity concerns committee to insure that they are fair and relevant to students of all backgrounds.

Tests used in the Massachusetts Educational Assessment Program and the Basic Skills Testing Program were designed for specific purposes. The results from each program, therefore, support valid conclusions in specific areas but may not support more general judgments about the performance of students or the quality of programs in any district. These cautions should be noted when interpreting results from the two programs:

In general, the Assessment tests and the Basic Skills tests:

are given at three specific grade levels and in specific subjects for each program	therefore	generalizing to all subjects and all grade levels can be misleading.
represent cumulative learning	therefore	results cannot be attributed to any specific group of teachers.
represent only one test, and in the case of Basic Skills, a test designed to measure mastery of minimal level skills	therefore	one cannot generalize to total achievement for the district.
produce results that reflect a variety of situations and underlying reasons for scores	therefore	one cannot generalize about reasons for performance.
are not the same as regular standardized commercial tests	therefore	results may not be the same as regular standardized tests.

More specifically, the Assessment tests:

are developed to help districts improve programs	therefore	labeling or unfairly classifying districts can be counterproductive.
provide district scores that are reported in terms of Comparison Score Bands based on socioeconomic background factors	therefore	the fairest comparisons are between districts with similar background factors.
were administered so that each student took only a portion of the total test	therefore	no individual student results are provided.
provide scores for which differences of less than 50 points are not educationally significant	therefore	scores should be examined for larger, more relevant findings.
do not provide validly generalizable results for districts with fewer than 40 students at a grade level	therefore	results for these districts should be interpreted with caution.

The Basic Skills tests:

are aimed at identifying students needing remedial assistance	therefore	the tests do not distinguish among levels of mastery.
are not diagnostic or prescriptive	therefore	schools are responsible for diagnosis and remediation of individual student needs.
are designed to identify individual students who need assistance	therefore	programmatic evaluation is not appropriate unless a district has high numbers and percentages of students who fail the tests.

HOW TO USE THIS BOOK

Results for the Massachusetts Educational Assessment Program for 1986 and 1988, and for the Basic Skills Testing Program for 1987 and 1988, are included in this book. Each page on the right, printed in green, includes results for the Assessment Program for a district or union. The reverse side, printed in brown, gives results for the Basic Skills Program for the same district. The data included in the tables are explained on the next page in sample shells of each report.

The reports are divided according to the categories used by the Massachusetts Department of Education in assigning code numbers to districts and schools. These categories include:

Section	Type of District	Range of Codes
I	Local school districts	001 to 351
II	Independent vocational schools	401 to 408
III	Academic regional schools	600 to 760
IV	Vocational-technical regional schools	801 to 885
V	County agricultural schools	910 to 915
VI	School unions	no code

Descriptions of these categories are provided on the tabbed divider pages that precede each section of results.

Section I: Most Massachusetts schools are included in Section I as local school districts. There are, however, several localities that do not offer schooling at certain grades but send their students to regional schools or are members of school unions. In those instances, the appropriate reference is printed in place of data for that grade level.

Sections II through V: The schools included in these sections generally enroll students from a variety of local districts for either a specialized purpose (as in the case of vocational schools) or because the local districts are too small to maintain schools at all grade levels (as in the case of academic regional schools). The data presented on those pages represent results only for the grade levels included in that particular district. No cross-references for data for other grades are provided, because the references would include a large number of local districts.

Section VI: School unions are collections of districts, usually small, that hire one superintendent as the chief administrator for all districts within the union. Because these districts tend to be small, and because the Assessment Program results have greater validity for larger groups of students, the Assessment Program results are provided for unions, when available, rather than for each of the individual districts.

SUMMARY OF DISTRICT PERFORMANCE

Summary of Students Tested

This table includes the numbers and percentages of students included in the district results. Students who were not included in the school report were placed into one of two categories in the 1988 reports: exempted, and incomplete or absent.

The state-mandated exemptions are:

- students who are incapable of performing ordinary classwork in English as determined by the English Language Proficiency Assessment and who have been enrolled in transitional bilingual education programs for fewer than three full years, unless a written request was submitted by the parent that the student be tested;
- special education students if exemptions were requested in writing by the parent.

Students who did not take the entire test battery and who were not exempted were counted in the "Excluded" category in the 1986 results and in the "Incomplete or Absent" category in the 1988 results.

Summary of Test Results

This table contains the test results for 1986 and 1988. For each grade, results are provided as scaled scores. For each subject, the possible range of scores is 1000 to 1600, with a statewide average of 1300. In the graphic display, the district's test results are shown as a diamond. The screened bar is the district's Comparison Score Band, which enables a district to compare its results to others with similar student background characteristics.

The Department of Education considers differences of less than 50 scaled score points to be not educationally significant.

Basic Skills
Testing
Program

SUMMARY OF DISTRICT PERFORMANCE

Summary of Students Tested

This table includes the numbers and percentages of students eligible for and exempted from testing in each subject for 1987-88 and 1988-89.

The state-mandated exemptions are:

- students who are incapable of performing ordinary classwork in English as determined by the English Language Proficiency Assessment and who have been enrolled in transitional bilingual education programs for fewer than three full years, unless a written request was submitted by the parent that the student be tested;
- special education students if exemptions were requested in writing by the parent.

Decisions about exemptions are made for each test on an individual student basis. Thus, some students might take the reading test, for example, and be exempted from the writing test. As a result, bilingual and special education students could be exempted from one, two, or all three tests.

All other students, whether actually tested or not, are included in district results. The number of students reported as "Eligible" is the number of students enrolled in the district minus the number of students exempted from testing. Comparisons of different districts' results are difficult because the populations tested may not be comparable. Significantly larger or smaller percentages of students exempted or otherwise not tested would have an obvious impact on the results.

Data are provided for the district and the state.

Summary of Test Results

This table provides the percent and number of students passing each test, and all three tests, for the district and the state, with Comparison Score Bands. The Board of Education set 65 percent correct as the statewide standard to pass the reading and mathematics tests, and identified a level of skill necessary to pass the writing test.

Students who did not pass the tests were in one of two other categories not specified in this table: fail or unknown. The "unknown" category identifies students who did not provide sufficient evidence of their mastery of basic skills to make a pass/fail judgment. In reading and mathematics, these were students who were eligible for testing but did not turn in test materials, or who returned materials but made no attempt to answer any of the questions. In writing, the "unknown" category includes students who did not write an essay or who wrote an essay judged not scorable—one that was off-topic, too brief to evaluate, returned as a rough, rather than final, draft.

A Comparison Score Band is included in this table, which enables a district to compare its results to those of districts with similar Background Factors. Background Factors are based upon the socioeconomic makeup of the student population and are described in greater detail in the school and district reports.

Unusual Circumstances Affecting Testing and Reports

Massachusetts school superintendents were asked to provide information on "any unusual systemwide circumstances that . . . should be included in the public reporting of statewide test results." The responses of superintendents who chose to report such circumstances are as follows and should be noted when reviewing and reporting their districts' results.

Uxbridge: Students in grades 3 and 9 are housed in buildings where substantial construction was in progress.

Results for Local School Districts

The results for local school districts are arranged alphabetically by city or town name, and represent code numbers 001 through 351 as assigned by the Massachusetts Department of Education.

Most Massachusetts schools are included in Section I as local school districts. There are, however, several localities that do not offer schooling at certain grades but send their students to regional schools or are members of school unions. In those instances, the appropriate reference is printed in place of data for that grade level.

Results for Independent Vocational Schools

The results for independent vocational schools are arranged by district code numbers 401 through 408 as assigned by the Massachusetts Department of Education.

The schools included in this section enroll students from several local districts and generally encompass grades 9 through 12. Therefore, no data are provided for other grades and no cross-references are provided, because the references would include a large number of local districts.

Results for Academic Regional Schools

The results for academic regional schools are arranged by district code numbers 600 through 760 as assigned by the Massachusetts Department of Education.

The schools included in this section enroll students from several local districts and comprise a variety of grade levels. If data are missing from any table, no cross-reference is provided. The missing data represent information that is available in the reports for the local districts that send students to the regional schools.

Results for Vocational-Technical Regional Schools

The results for vocational-technical regional schools are arranged by school code numbers 801 through 885 as assigned by the Massachusetts Department of Education.

The schools included in this section enroll students from several local districts and generally encompass grades 9 through 12. Therefore, no data are provided for other grades and no cross-references are provided, because the references would include a large number of local districts.

Results for County Agricultural Schools

The results for county agricultural schools are arranged by school code numbers 910 through 915 as assigned by the Massachusetts Department of Education.

The schools included in this section enroll students from several local districts and generally encompass grades 9 through 12. Therefore, no data are provided for other grades and no cross-references are provided, because the references would include a large number of local districts.

Results for School Unions

The results for school unions are arranged by union number; they do not have code numbers assigned by the Massachusetts Department of Education.

A school union represents a collection of school districts headed by one superintendent. They are typically composed of small towns.

The reports for the unions include Assessment but not Basic Skills results; for that information, see the reports for specific towns that are included in the union in Section I.

Below is a listing of the unions and school districts included in each:

- **Union 10**
    - Mashpee
    - Sandwich
- **Union 14**
    - Provincetown
    - Truro
- **Union 18: Pioneer**
